

Seat Track Hole Locator

P/N STHL1

FEATURES

- Enables maintenance technicians to completely trim, pre-drill and modify any aircraft seat track on the work bench without the need to go to the aircraft. One removal step and one final installation step.
- Reduces aircraft downtime and labor expenses by 30% to 60%.
- Blind holes are easily located with precise accuracy right on the work bench.
- Makes a perfect duplicate of the removed damaged seat track on the work bench. Allows junior technicians to complete this task with ease.
- Reduces material waste by eliminating mis-drilled holes and mis-marked cut lines.
- Adapts to any seat track configuration on any aircraft type.
- Easy to follow instructions with clear illustrations included with each kit.
